

YOUR

PERFUME

SCINMS!

95% of chemicals used in fragrances are synthetic compounds derived from petroleum. They include benzene derivatives, aldehydes and many other known toxics and sensitizers -- capable of causing cancer, central nervous system disorders and allergic reactions.

Source: Neurotoxins: At Home and the Workplace, Report by the Committee on Science & Technology, U.S. House of Representatives, Sept. 16, 1986. (Report 99-827)
